

Set Up IMAP - Windows Mobile®

If you would like to learn more about the differences between POP and IMAP, please see the help topic, "[POP vs. IMAP](#)."

To set up Windows Mobile for IMAP, do the following:

1. On your Windows Mobile device, open the **Messaging** application and create a new account.
2. When Windows Mobile prompts you, enter the following information in the fields provided.
 - User name - Enter your entire email address, using all lowercase letters (e.g., myname@mydomain.com).
 - Your Name - Enter your name. This is the name that will be displayed when you send an email message.
 - Password - Enter the password associated with your email account.
 - Account type - Select **IMAP4**.
 - Name - Enter a descriptive name for the account (e.g., Work Account).
3. Enter the following mail server information:
 - Incoming Mail: **secure.emailsrvr.com:993**
 - Outgoing Mail: **secure.emailsrvr.com:465**
4. Click the **Require SSL connection** box.
5. Click the **Outgoing mail requires authentication** box.
